

GRADE 6 SECOND QUARTER CONCEPT NOTES: SY 2015-2016

Rectangle is the golden or special shape/ figure which most artist used to frame up or plan their work of art. It is an invisible shape where almost all artwork are planned or designed. Some artists give it a try to use other shapes like square, circle, triangle, etc.

Visual Stories could be related or presented through varied interesting ways. Making visual stories can be done through accordion- making, flip book, toy television, flash cards or album.

These are means to visually present a story read, viewed or listened to. These could be related or presented through varied interesting ways. We can use our talents in art and crafts using a lot of interesting ways to present the different elements of the story. Illustrating the story makes the book more memorable and rewarding.

Examples of Visual Stories:

- 1. Accordion** - A visual story with fold or pleats
- 2. Flip book** - A quick turn of pages with pictures, making motions or actions.
- 3. Flashcards** - A set of cards with words, numbers or pictures, which are flashed one by one before a class for quick response for a drill.
- 4. Album** - A bound or loose-leaf book with pages with mounted pictures to tell stories
- 5. Toy television** - A visual story where pictures are viewed by using a box or rolling improvised tubes

DRAWING GRID – is an inexpensive, low-tech way to reproduce and/or enlarge an image that you want to paint or draw. A picture may be copied or enlarged/reduced in size through this scaling technique or placing/ enclosing its parts in equally sized grids.

- A picture can be enlarged by transferring the part drawn in a small grid to a bigger one.
- Remove or erase the grids first before applying colors to a picture.

DISTORTION is a form of art which sometimes create more interest, humor and sense of variety to the viewers.

- Changing the appearance of a person or animal's body parts through drawing/painting using lines, shapes, and colors will help create twisted or distorted form.
- Cutting or tearing a picture using a kind of line, in any direction and pasting them far apart on another sheet would create a twisted form or distorted effect.
